CHIROPRACTIC RENEWS HEALTH

MR. S. D. REYNOLDS, of Hyde Park, California, under date of January 15th, 1923, says:

"On November 13, 1922, I went to see a chiropractor to find out if Chiropractic could do anything for my left hand, which was swollen to twice its size. The chiropractor examined my spine and found, as he called it, a subluxation of the first dorsal vertebra to the left side, also a very prominent subluxation of the twelfth vertebra, which he said was for my kidneys. He also told me I had bronchitis, and I sure had it for fifty-four years. I am now sixty-two years of age, and my bronchitis started in when I was eight years old.

"I took a course of Chiropractic Adjustments, the swelling in my hand disappearing after but few adjustments, and the bronchitis got better, too.

"Today, January 15, 1923, I came back to my chiropractor to give him this unsolicited testimonial and picture, for I am convinced that Chiropractic has relieved me of my bad companion, 'bronchitis'.

"I give Straight Chiropractic, the real 'honest to goodness' kind of Chiropractic, all the credit for my recovery."

CHIROPRACTIC is an exact Science, the exponents of which will locate the cause of disease and adjust same, using nothing but their bare hands. Ask those who know.

Get rid of your Asthma at home via Chiropractic. It is much cheaper and more successful than seeking a change of climate.

Do you know that Health and Happiness are yours if you will but reach out your hands and grasp them? Chiropractic makes this possible.

The cause of Stomach Trouble is not in the stomach. The effect is there all right, but the cause is in your spine, where misplaced vertebrae pinch the nerves leading to the stomach. The competent chiropractor relieves this pinching by adjusting these vertebrae (small bones of the spine).

The competent chiropractor does just one thing and that is to adjust the subluxated (misplaced) vertebrae (small bones of the spine), in order that all nerve pressure will be relieved.

A healthy child means a healthy adult and a healthy adult means a happy and well ordered household in the course of events. Keep the children well.

There is no excuse now for being a "chronic invalid." Put yourself in the hands of a competent chiropractor and you will be surprised at the result.

It hardly seems possible that a small spinal bone out of place is the cause of your sickness. This is, however, a fact. Consult a competent chiropractor at once and let him adjust the cause.

What is your excuse for being sick when you have right at your very door a competent chiropractor who will locate the cause of your sickness and adjust it?

Become personally acquainted with your chiropractor. He will tell you many things of which you may now be ignorant. He will teach you to get well and keep well.

If you are bothered with periodical headaches, I can assuredly help you. Chiropractic locates the cause and adjusts it. When this is done the effect (headache) disappears. Try it.

Many people suffer from Gastritis and many have been relieved through taking Chiropractic Vertebral Adjustments. A pinched nerve causes the nerve supply to the stomach to be deficient.

You are not only interested in preserving your own health, but also in giving your children a chance to become Healthy and Happy men and women.

Is that tiresome cold still boring you? Don't let it wear you out. Don't let it slack your vitality. Try the simple way. The competent chiropractor will give you a spinal analysis and undoubtedly find that the trouble is caused by a subluxated vertebra pressing on the nerve and preventing the all-important vital force from flowing uninterruptedly to the nose and throat. Chiropractic adjustments are what you want.

In a case of tonsillitis the most sensible thing for you to do is to call in a chiropractor and let him adjust the cause of your trouble. Do not allow a removal of the tonsils. They are essential for your needs. Otherwise the Creator would not have placed them within your body.

I wonder who this is ?

Oh! It's the Sandman.

RELIEVES PAIN

Charles Lemmons, of Central Nyack, N. Y., under date of April 2, 1922, says:

"I suffered excruciating pain from an ulcerated tooth for three days, beginning February 11th, so that I could not sleep or eat for two days.

"I called in a physician and he informed me that he could do nothing for me, and that I should see a dentist.

"Knowing about Chiropractic and what it has done for my boy, who had convulsions, I decided to call in a chiropractor, who lost no time in locating the cause of my trouble, which he told me later was a subluxation of the fifth cervical vertebra of my spine, which caused an impingement of the inferior dental nerve. After adjusting the subluxated vertebra in question to normal, the pain ceased, the swelling gradually decreased and the soreness in my jaw left me.

"To say that I was pleased would be putting it too mildly. I was astonished to find that with a simple little twist of the head, which was painless, I got rid of so much pain. I will say Chiropractic is SOME science."

ABOVE GIRL RELIEVED FROM ASTHMA THRU CHIROPRACTIC

MR. and MRS. WILLIAM H. PUSEY of Laurel, Del., under date of February 23, 1923, say:

"It is our earnest desire to attest to the marvelous, almost miraculous results of Chiropractic in the case of our daughter, Evelyn, age eight years. When four years old she was taken with asthma. We tried the medical doctors and every remedy we could get known as asthma cure, but they all failed.

"So we learned of Chiropractic. We laid aside all medicines and let the chiropractor have full sway. Evelyn has gained twelve pounds and there are no signs of asthma.

"She seems entirely cured. We owe her life to Chiropractic and shall always praise it for its wonderful work."

The originals of all testimonials appearing in this number are on file at The Palmer School of Chiropractic, Davenport, Iowa.

INFLUENZA

J. Alban Fraser, of 68 Queen Square, Bristol, England, under date of January 12, 1922, says:

"It was towards the end of 1918 that I had a nervous breakdown from overwork, and at the same time was attacked by influenza—then at its height—complicated by serious heart trouble.

"Though all that doctors could do for me was done, I grew steadily worse, till in the spring of 1919, unable to endure the slightest sound in my room, or to speak save in monosyllables, I lay at the point of death. It was then that I first heard of Chiropractic and spinal adjustments, and very positive as to the integrity of my spine, I grasped the straw and placed myself in the chiropractor's hands.

"After a few adjustments I was able to be moved to my office, where for a long time I supervised and attended to the work. Doing so retarded my recovery to some extent, but little by little my strength returned, and today I owe to the science of Chiropractic not only that I am alive, but that I am able to carry on practically as before, and to all appearances am better in health than for years."

Is Your Chiropractor Competent?

HARRY E. VEDDER, D. C., Ph. C.
Professor and Author of
Chiropractic Physiology

TWENTY-EIGHT years ago there was brought forth and presented to the healing professions a new principle, which has since grown to such proportions that it numbers its followers by millions.

This is the principle of Chiropractic which holds that within every human body are all things necessary for perfect health. This principle maintains that the thing which makes us living, thinking, acting beings is that immaterial something which operates through the brain and is distributed by the nervous system to all parts of the body. So long as this vital force is properly transmitted by the nerves to each and every organ in that body, that organ must be healthy and must function normally. It is only when interference occurs which makes these nerves incapable of carrying this vital energy that sickness appears.

This new principle, which has since been named Chiropractic, is founded on the very principles that actuate all living things.

When we turn our eyes to the right, we first think the thought and as a result of that thought the message is carried through the nerves to the muscles controlling the eyes, and movement is the result. Not all the functions of the body, however, are conscious functions. Some of them result

A Competent Chiropractor's Only Tools

from this vital energy being sent out through the nerves without our being aware of it. This is evidenced by the movements in the stomach and the formation of the juices which digest the food after a meal is taken. All this is accomplished because of messages being sent to this organ through the nerves.

Every chiropractor knows that the only place where nerves may be pressed upon is where they pass out from the spine. Here, if the bones forming the spine are not in their normal positions, pressure is produced and sickness results. The chiropractor is trained to accurately locate where such pressure exists in the spine and, having done so, to restore the vertebrae to their normal positions.

This is all the chiropractor does. He neither has recourse to the vibrator, to stretching machines, to therapeutic lamps, to massage, to the violet ray or to any other system that is not calculated to restore the vertebrae to their normal positions.

If a practitioner does anything else than give adjustments with his bare hands for the purpose of relieving pressure on nerves, he is using something else than Chiropractic and thereby demonstrates his inability to procure the necessary results through Chiropractic. If he does any of these other things, he himself is not convinced of the efficacy of Chiropractic adjustments and naturally he fails to convince his patients.

This article is written with the thought that it will fall into the hands of many people who are at a loss to distinguish between the competent chiropractor and the incompetent.
