Women and Children Diseases a Specialty

We most cordially invite those who desire proficiency, enlightenment and evidence of our success in removing the cause of disease, to the final restoration of health. Our highest skill and energies are devoted to the relief of suffering, fully realizing that an untold blessing is conferred to every patient who is restored to health. We never encourage and hold out false hopes of recovery. We tell you candidly whether we can help you or not.

We wish to meet those pronounced "Incurable" by all other methods.

If you have tried everything else and have become discouraged through failure of relief try Chiropractic as others are doing at our hands.

Write, phone or call.

ORIGIN OF CHIROPRACTIC.

In the year 1895, D. D. Palmer, a magnetic healer, came in contact with one Harvey Lillard, a janitor. Mr. Lillard was and had been deaf for seventeen years. Dr. Palmer, in a crude manner, gave a "Chiropractic adjustment," and Mr. Lillard completely regained his hearing. From this time on the principles of Chiropractic has revealed that the impingement of nerves, (obstruction of nervous innervation to the tissues and organs) are the cause of ninety-five per cent of diseases.

Graduates of a College and personally trained by its president, who is to Chiropractic what Thos. A. Edison is to electricity—a peer. Specially and personally taught by D. D. Palmer, Chiropractic Fountain Head—The discoverer and founder, also special study and practice in Los Angeles, Cal.

Letter Reference:—U. S. Senator, Governor, State Representative, Adj.-Gen. National Guard, Bank President, and Patients.

PREFACE.

It is with a natural and pardonable pride that we issue this announcement, the first number of the "Eugene Modern College of Chiropractic-Neuropathy and Evolutionary Academy of Scientific Rejuvenescence and Sanatorium," in this, the grandest city on the Pacific coast—Eugene, the "Live City."

With a high ideal as our goal, and an honest and sincere motive for the relief of the clamoring and suffering multitudes, we ask the hearty co-operation of our scores of patients and friends which shall spur us on to a higher plane, a brighter future for all concerned, and a pathway strewn with appreciative remembrances of kind deeds, which we all can look ahead to with the one thought of being restored and the restoring the invalid to health, relieving the sufferer, and doing good to all mankind. When this highest of expectations shall have become a reality we shall be satisfied, only, by speeding further onward and upward until a still greater good to the sick shall have been attained.

The following are a few of the numberless so-called diseases which this science successfully removes the cause from if proper adjustments and time is given:

Appendicitis	Rheumatism
Tumors	Tonsillitis
Abscess in Ear	Indigestion
Sciatica	Goitre
Stomach and Liver	Typhoid
Troubles	Paralysis
All Fevers	All Female Disease
Blindness	Dropsy
Hay Fever	Eczema
Pleurisy	Piles
Lumbago	Asthma
Gall Stones	Diabetes
Deafness	Catarrh
Malaria	Headache
Bed-Wetting	Wryneck
Jaundice	Constipation

Ninty-five per cent of diseases are caused by poisons taken into the system by food, air, water, drugs, etc., causing too much or not

Naturopaths, medical men, osteopaths, mechano-therapists and many other practitioners have and are taking up Chiropractic as a superior science and are abandoning their old methods. Call and see partial list.

Men, as a rule, are first discovered by their enemies. Their antagonists turn on the searchlight. There are always "men" who aim to tear down every good thing; there are some who set about to ridicule our unprecedented success and advanced science. They turned on the gleam and dissected it. They expected to show mere dross but found glittering gold.

Chiropractic has its imitators. Demand satisfactory proof of the years such pretender attended college. Allow no one to adjust your spine who has never seen an adjustment given or a Chiropractic college, as injury may ensue.

Every time you kill a pain, by stupefying the nerves with poisonous drugs, you are hurting and curtailing their efficiency, and in time, by steady dosing, your nervous system will be completely broken down.

People willingly pay large sums for life insurance, which is really death insurance; but real life insurance consists in taking Chiropractic adjustments from US.

Tension upon nerves stimulate or inhibit transmission of impulses, causing abnormal function in organs or tissues.

Nerve impulses controls every action of the body; abnormal nerve function creates disease.

Our adjustments are easy and in many instances painless.

COLLEGE COURSE.

The course consists of continued attendance. Every hour of absence MUST be made good. It is not so much the length of time one puts in, BUT WHAT ONE GETS OUT OF THAT TIME. A one-year student in Chiropractic-Neuropathy can get more actual and practical knowledge for the removal of the cause of disease and final restoration to health of the patient than a lifetime in most other branches. The standard medical books are used.

CURRICULUM.

Anatomy
Physiology
Pathology
Etiology
Biology
Hygienic
Regional and
Histological-Neurology
Osteology
Orthopedy
Special
Symptomatology,
Diagnosis
Theory
Philosophy and Art of the
Drugless Sanatory and
Prophylactic Science of
Chiropractic-Neuropathy and
Rejuvenescence.

Upon successful passing the requisite examinations of 85 per cent (monthly) and 100 per cent (with previous credits) in the final examination, a beautiful munimental diploma will be issued to the student.

We invite the closest investigation by all classes.

Address the Secretary, Suites 227-228, Merchants Bank Building, Eugene, Oregon.

School is now in session. YOU may start any day.

The following are a few of the numberless so-called diseases which this science successfully removes the cause from if proper adjustments and time is given, the adjustments removing the cause of every disease the human flesh is burdened with:

Appendicitis	Rheumatism
Tumors	Tonsilitis
Abscess in ear	Indigestion
Sciatica	Goitre
Stomach and liver troubles	Typhoid
Tobacco habit	Paralysis
Alcohol habit	All female diseases
Hay fever	Dropsy
Pleurisy	Eczema
Lumbago	Piles
Gall stones	Asthma
Deafness	Diabetes
Malaria	Catarrh
Bed-wetting.	Tumors
Jaundice, etc.	Wryneck
	Constipation

Ninety-five per cent of diseases are caused by poisons taken into the system by food, air, water, drugs, etc., causing too much or not enough nerve innervation. Investigate for yourself, and be happily surprised—you'll be satisfied.

ASK THE PATIENTS.

Why operate for "appendicitis" when Chiropractic-Neuropathic adjustments will remove the cause—and the pain—and the "patient" loses neither time, life, nor a fortune. We believe that 99 out of every 100 so-called cases of appendicitis is not such and that 9 out of every 10 operations are unnecessary, especially if Chiropractic adjustments are given. Ask any of our patients about it.

Students not only obtain the profession, but get the adjustments at the same time, which in many instances, amount to as much as the tuition.

We are very particular about patients being punctual about their adjustments. It is very essential that they attend regularly.

We are pre-eminent in varied schooling and knowledge, Chiropractically, and no one in Oregon has received the extra training that we have from different teachers and practitioners in different states.

We predict that within ten years regular physicians who cannot deliver Chiropractic will be relegated to the rear for want of restorative methods.

The nervous system is the dynamic power of man and is the essential unit of all bodily functions.

We, as Chiropractors, do not "treat" disease; we remove the cause of disease. That's why WE generally succeed where all others fail.

Body tissues and organs are wholly dependent in every instance and respect upon their functions and energies to the nerves—wholly and entirely subservient thereto—hence any aberration of the nervous impulses and functional activity causes an inharmony of function—lack of tone, lack of harmony, lack of nerve innervation—disease.

We, as Chiropractors, triumph over all other practitioners, because we remove the cause, thus assisting nature to restore health. That's the missing link FOUND BY US, hence OUR success.

We correct the cause of abnormalities and

We could place 1000 Chiropractic Doctors today in Oregon if our College had them to turn out. Every town wants from one to five.

Before submitting to operations have Drs. Jenson & Jenson give you a scientific and accurate examination, and they may save you an unnecessary expense and suffering.

Our adjustments never does harm and seldom fails to restore the hopeless.

We have but a single science; but that we claim pre-eminence in. If you want conglomeration of "little of every science" you will have to go elsewhere; we deal out no "hash" here. We are not "Jacks of all trades"; we are masters of one.

"Out of sorts?" If so, you should undergo an "overhauling" like a machine. An adjustment by US once a month, once every three or six months, will keep you in "tip-top" condition. We get patients from all other practitioners.

Our success has attained its lofty height by the merits of restoration of the sick to health by assisting nature.

We, as Chiropractors, remove the cause, counteracting the loss of normal functional activity, thus restoring and increasing the strength mentally and physically of the patient, restoring the true function of rejuvenescence.

ETHICALISM

That surgical patients are sold to the highest bidder in Spokane and other northwestern cities is the declaration of the North Pacific Surgical Association which was formed this week for

NEUROLOGY.

The study of nerves is the most extensive study of this college. It is through and by nerves that all functions are performed, and that all pathological conditions are due to their interference by impingement (cutting off nerve innervation.) The study of the nervous system is so thorough, that the student becomes an accomplished neurologist and master of his profession. The knowledge and training obtained from this school in neurology gives him the knowledge of the cause of pain, and how by a movement of the hand may remove the pain. He also understands the cause of fever, why cold has effect upon the body, how the body is kept warm, why poison has such an effect upon the tissue, etc.

The man or woman who seeks to improve his or her condition in life cannot do better than to take up the study and practice of Chiropractic, the new and wonderful successful science of "treatment," which is revolutionizing the various "curative" methods (as scores of all other practitioners are doing now) and providing a most lucrative source of income for those who enter this profession. Every town is asking for a "Chiro."

THE QUALIFIED CHIROPRACTOR.

The thorough Chiropractic-Neuropathist understands the human anatomy upon physiological lines, he must know the construction of tissues, normal and pathological, their functions in health and disease, also the cause of disease, he must be well versed upon SYMPTOMATOLOGY and NOSOLOGY, so that he can intelligently classify all morbid causes and functional changes presented to him, before the patient is prepared for adjustments.

Don't be a Haswasser,
Be an Isnow—
Take Chiropractic.

WHAT IS CHIROPRACTIC.

Chiropractic is founded upon the knowledge of functions performed by Innate's desire, directing its vital energies as transmitted through the nervous system to specialize the co-ordination of sensation and volition. The cycle of events in all nerve-actions are perceived by the peripheral nerve-organs, with perceptions and reflexes of these impressions in the lower nerve-centers, correlations of these with higher center-impressions, with voluntary reactions or inhibitions, liberated in compliance with the fundamental requirements of organic and higher needs of the individual, which shows the nervous system of man to be the first to be created in man, showing conclusively that it is the higher functional potentiality of all tissues. So marvelous is the mechanism of the nervous system that the slightest inco-ordination cause an aberration, that the cause of ninety-five per cent of diseases are traceable to impingement of the nerves, causing too much or not enough nerve innervation, due to poison taken into the system by food, water, air, drugs, or operations.

CHIROPRACTORS IN DEMAND.

This profession is comparatively new. But few have learned it. Those who have are now in practice and doing fine, and doing a great deal of good in this world of pain and suffering. This art of adjustment has aroused the greatest and most widespread interest all over the country because of the miraculous results afforded by this rational system of removing the cause of disease that appeals to reason and common sense of the people. In every city, town, village, and hamlet in this country the demand for Chiropractors is steadily growing. They find a cordial welcome wherever they go, for their calling and mission is to relieve the suffering. The Chiropractor is known by his results wherever he goes.

Unprecedented! Not a single death has occurred during our entire practice, nor even the slightest accident, in Eugene, Los Angeles, or Portland. Pre-eminence, and specialty in a single science is the reason.

This is an age of specialists in some one certain pursuit. Being specialists in our one line we are pre-eminently qualified to diagnose correctly and execute our science scientifically. Those claiming "a little of everything" cannot be reliable in anything. The age of "Jacks of all Trades and Masters of None" is past.

Drs. Thos. and Ella Jenson, Merchants Bank Building, are the pioneer Chiropractors in Eugene. Ask your neighbor about their almost miraculous restoration to health by US.

A guarantee to "cure" any patient is a fraudulent assertion, and no honest man will take your money until you are "cured." No man can "cure"—nature alone does that.

Our school is continuous the year around.

WHY WE ARE CHIROPRACTORS

Because drugs galore (we were formerly in the drug business), operations and other methods failed to "cure" Dr. Ella Jenson, and a Chiropractor easily restored her to health, we became practitioners in this world-revolutionizing science.

WHY WE ARE IN BUSINESS

Because other methods are inadequate. Hardly a family exists today without its quota of sick and its invalids, either in spite of or because of, all other methods. That's why the sufferers are clamoring, in anguish, for relief from their bondage, having generally grown helpless from a mild form, until finally, as we had to do, submit to operations, and if no relief

No sufferer ever has, or ever will be, turned away because of lack of funds. We do not demand cash in advance in order to compell patients to remain with us. "Without money---without price" is our motto to the unfortunate destitute sufferer.

Don't despair. God has revealed the science of Chiropractic which comes to the sick as an angel does to the bereft bringing light and hope to the sufferer converting their pronounced hopelessness into health and happiness. Call on Drs. Thos. and Ella Jenson and let those specialists explain to you.

The success with which we are meeting all classes of diseases is not only flattering to our superior skill and science but Phenomenal.

Many people appeal to us, from the knife, with astounding and satisfactory results.

QUALIFICATION

Specially and personally taught by D. D. Palmer, Chiropractic's fountain head---discoverer and founder.

Graduates from a college and personally trained by its president who is a leader in the science.

Special work, special study, and practice in Los Angeles, Cal.

Letter reference: U. S. Representative, Governor, State Representative, Adj-Gen. Natl. Guard, Bank President, and Patients.

ORIGIN OF CHIROPRACTIC

In 1895, D. D. Palmer, a magnetic healer, came in contact with one Harvey Lilliard, a janitor. Mr. Lilliard was and had been deaf for seventeen years. Dr. Palmer, in a crude manner, gave a "Chiropractic adjustment", and Mr. Lilliard completely regained his hearing. From

INVESTIGATE.

No man two thousand miles away, nor men who have never seen the inside of a Chiropractic college can teach Chiropractic correctly. To attempt to do so is to lower this grand science in the public's estimation. Ask to see diploma from a college and time of attendance. Our books are open to all. Investigate fully.

HOW TAUGHT.

A full course of instruction in the Principles and Philosophy of Chiropractic-Neuropathy is given. The student is assisted in every way so that the study is made short. This study is greatly aided by illustration and demonstration in the operating room where patients are adjusted, and students are required to operate under instructors, for every imaginable ailment. The effect is watched and the result is noted. Later the student is required to operate under the instructors' personal supervision. Personal instruction and the greatest care is exercised and given each student that a thorough knowledge may be imparted in the shortest time, and a practical learning in the operating room, so that when the student commences to practice the knowledge of knowing how to do it properly, will not be lacking in any instance, no matter what kind of a case may present itself. He or she will be fully equal to the occasion.

BE FAIR.

Don't expect a Chiropractor to "cure" you in from one to ten days, after becoming an invalid during a lifetime of "treatment" from other methods. Give us at least one week for every year's "treatment" with other methods. True, many get relief with one adjustment—but it is not reasonable to ask us to "cure" all such patients in one day—give us one-tenth the time and money—then we will be pleased to compare results.

SKEPTICISM OVERCOME.

In diseases which it is claimed must run their course (typhoid, etc.) the results are amazing, because by Chiropractic-Neuropathic adjustments the Producing Cause of the Disease is Removed, and nature is free—free to act and perform normal functions, which she does, and disease is vanquished. It sounds miraculous to those who do not understand this principle of Nature's laws. So did the idea of telephone, the telegraph, the phonograph, wireless telegraphy, and all advances in science and learning, when the idea was first given to the public. But they are now established facts. So is Chiropractic-Neuropathy equally well founded as Nature's Greatest Ally.

WOMANHOOD—GIRLHOOD—CHILDHOOD.

Chiropractic-Neuropathy applied in the parturient stage has no comparison in shortening labor, lessening pain, rendering abnormal conditions normal, and thus doing away with much unnecessary suffering. It makes this most important period in woman's life a pleasure instead of a fearful climax.

So many girls do not know what a healthy, happy girlhood is, because of improper development of the delicate organs from abnormal nerve innervation, which cause morbid conditions and endless pain in womanhood.

Don't let a child grow into a sickly, measly man or woman, to whom life is a burden instead of a pleasure, when a few Chiropractic (spinal) adjustments will remove the cause of their trouble and allow them to develop properly.

The management will be found at all times ready to talk with and advise the sufferer from disease, of any nature, and to explain, in a plain, straight forward manner, the common-sense principles of Chiropractic adjustments, which allows nature in almost every case to effect a cure.

We have no hireling in the park or on the street to boost us and knock others. Satisfied patients, restored to health, are our only boosters, voluntarily so, because of gratitude to us.

The man (?) who asserts that we have at any time sold out our practice is a fit subject for Teddy's Ananias Club without examination.

With normal nerve force we have life and health; with an aberrant nerve innervation we have illness, and later, death.

Chiropractic is a natural scientific art of removing the cause of disease without drugs or knife. It is safe, sane, reliable for the relief of pain and restoration of health.

Give US one-tenth the time you have "doctored" with others and we will be pleased to compare results.

Everyone who is sick, no matter what their ailment, should call on or write Dr. Jenson & Jenson, Merchants Bank, Suites 227-228, Eugene, Oregon, for confidential advise and diagnosis.

All should unite to assist any science or method that tends to relieve the suffering and the restoration to health, whether that method be drug or drugless, mind or medicine, surgery or religion—no matter which. The object is to "cure", and no true American will put a single iota in the pathway of another if he alleviates the suffering.

No mental triumph, or moral uplift, or physical achievements will be permanent unless it results in the perfectness of the functional equilibrium of the nervous system.

We do most emphatically state that we are not, and do not claim to be an "army, physician" as others do nor any other false claim. We claim nothing but pure Chiropractic, but that as no other person in Oregon from point of varied schooling and successful practice in different states.

Students of other schools, practitioners of Eugene and adjacent cities, or others desiring to complete or broaden their knowledge along a higher plane of removing the cause of disease, may enter our school any time. You may take a post graduate or full course.

It is presumptuous and the height of folly to think that cutting out an essential organ will create health.

Chiropractic is the Elixir of Life

ESSENTIAL.

The most essential and foremost study in this college is the nervous system and its functions (the dynamic power of man); second, the functions of all organs and tissues in the physiological and pathological; third, thorough symptomatology; fourth, osseous tissues (spinal, etc.); and the fundamental principles and philosophy of Chiropractic-Neuropathy.

WARNING.

Irreparable injury may be done if adjustments are attempted by malpractitioners. Insist on seeing diploma from a reputable Chiropractic college before submitting yourself to adjustment.

Chiropractic has shown itself adequate in every trial where honestly tested. It has overcome opposition, subdued much prejudice, and stands out in bold relief—without an equal—and is being recognized as indispensable wherever tried.

Many of the "fairer sex" have already become successful Chiropractors. The woman practitioner is aided in her work by her more sympathetic nature and her keener intuition power, as physical strength is not needed in the practice of Chiropractic adjustments.

Every act and function of the body and organs are functions performed by and through the brain and subservient nerves by Innate and Educated Intelligence; as the Caloric system, which heats the body, for instance.

The sincere and ambitious man or woman who graduates in this college not only creates an opportunity that guarantees his financial success, but has the satisfaction of knowing his work is a noble one which will earn the lasting gratitude of thousands of fellow mortals made well.

QUALIFICATIONS.

The only qualifications necessary for the Matriculant at this school is a common-sense education; good common sense; a clean character; a willing mind; and special kindness at heart for the suffering beings.

POST GRADUATE COURSE.

A post graduate course has been arranged for, where the students and practitioners of any school of practice may obtain a diploma at our college by passing the requisite examination.

WHEN TO START.

The course of study is so arranged that a student may matriculate any day—a continuous course—finishing where one commenced.

Standard medical books, charts, skeletons, spines, etc., are in constant use in this school.

The Chiropractic Adjustment as given and taught at this school is neither as fatiguing, trying, nor half as painful as some other drugless methods. It requires but five minutes for each patient. It is direct, specific, scientific, and in accordance with the laws of nature.

A person, like a machine, is benefited by repairs, therefore should submit to an occasional examination and if found necessary, should take a few adjustments periodically throughout the year—one a month, or one every three or six months—to keep in perfect health—as you would keep a building or implement in good repair.

This Science and Art which God has revealed to the Chiropractor for suffering humanity shows that He intended a higher potentiality to which the "curing fraternity" should rise—hence this the greatest Science the world has ever given.

brave soldiers who, in the struggle with the foe, have covered themselves with glory; but how much more brilliant is the achievement of the advanced scientific Chiropractic-Neuropathist who overwhelms disease, that common enemy of mankind, whose victims are numbered by the millions, and whose suffering and anguish is beyond portrayal for want of a sufficient science to Remove the Cause of disease.

Unto us are committed important health-producing, health-preserving trusts, which we, as Chiropractic-Neuropathists, hold, not merely in our own behalf, but for the explicit benefit of suffering humanity. If we discharge the obligations of our trusteeship as an advanced science of removing the cause of disease, as no other science can, we do deserve, and will enjoy present trust and confidence reposed in our usefulness, but we MUST be endowed with our acknowledged superiority of scientific knowledge to RID the clamoring invalids of their pangs of illness; to do so we MUST POSSESS THE LATEST and MODERN KNOWLEDGE of the LATEST and MODERN COLLEGES of this science; we MUST ADVANCE beyond and upward from the old schools, or we deserve to sink into everlasting oblivion. We must ever strive to PROVE OURSELVES WORTHY of the highest name and professional honor and commission of the world, that we may enjoy the sweetest of all pleasures—the delicious and satisfying fruitage of honest toil and faithful obedience to the high attained commission of DELIVERANCE FROM BONDAGE and suffering through the GREATEST and GRAND-EST SCIENCE the WORLD HAS EVER GIVEN—CHIROPRACTIC-NEUROPATHY—which the suffering have been patiently awaiting these hundreds of years.

Chiropractors neither "treat" nor "cure" disease. They remove the cause—and nature cures—nature ALONE can.
