ACA Day Activities

October 1975

The September 18th ACA Day on the W.S.C.C. campus was a huge success with 100% participation of the student body. Dr. William Dallas of Tacoma Washington, American Chiropractic Association

President, was the guest speaker. His message to the students was well received and generated much interest.

Channel 2 television news was on the campus to cover the activities and taped an interview with Dr. Dallas.

Several awards were also presented by the A.C.A. Auxiliary and the O.A.C.P. Womens' Auxiliary. Mrs. Johnnie Johnson represented the O.A.C.P. Auxiliary.

Award recipients were as follows:

Bob Cothier	Dartell
Leaun Fuchs	Dartell
Mindy Cator	O.A.C.P. Womens' Auxiliary
David Keck	O.A.C.P. Womens' Auxiliary
Library Fund	O.A.C.P. \$100.00
Library Fund	A.C.A. Womens' Auxiliary \$500.00

Following the formal proceedings, a watermelon feast was held mid sunshine and socializing on the lawn.

Tutorial Program Instituted

The students who come to Western States Chiropractic College come to us from diverse backgrounds and with such a variety of academic preparation that some find themselves unprepared to handle our introductory courses. Recognizing this problem, the faculty and administration have developed a tutorial program to assist the individual student who finds himself floundering.

The Tutorial Program is coordinated by the Instructional Media Center and is staffed by upper division students under the supervision of Dr. Ron Menke of chemistry and Ms. Penny Amy of the biological sciences. Student tutors are available from 5 to 7 p.m. Monday through Thursday in Room 1 of the Administration Building. This program is available to any student in need of help; and, there is no added cost to the student for this service.

One immediate outgrowth of the Tutorial Program is the Remedial Chemistry course which Dr. Menke has developed for freshman who have had inadequate preparation in chemistry.

Church Service Refunds

Word has been received from the court appointed Receiver that all releases have been signed and refund checks should be mailed in the near future.

Attorney for the Health Research Foundation, Mr. Henry Carey, has informed the school that the delay in issuing refunds has been due to the court not assessing the attorney fees to the Church Service Organization. This has now been completed.

Library Facilities

It is generally known that since our purchase of the entire United Medical Laboratories library last March, we have in excess of 30,000 reference texts plus many thousands of bound journals, etc. This new purchased library consists of the Carnegie Institute recommendations of basic science books and periodicals for all colleges and universities, bound scientific journals, including back issues, medical law library, index medicus guide, numerous reference books in the areas of histology, microbiology, immunology, pediatrics, geriatrics, and industrial references in pharmacology, chemical engineering, and related fields relevant to the student of the healing arts. The cost involved in the original purchase of all the journals, references, card catalog, and books was in excess of \$150,000.00.

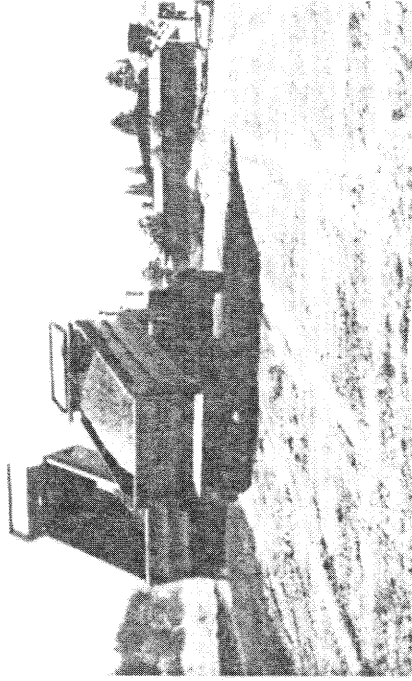

You may not be aware of the very large stock of learning aids which are of great value to the students. There are eight volumes of colored stereoscopic slides covering all phases of human cadaver dissection with accompanying descriptive text and diagrams. Many complete auto-tutorial courses are available in basic and general chemical principles such as common ion effect, chemical equilibria calculations, balancing

redox equations, heat transfer, half cell reactions, ionic equilibrium series, electrochemistry series, organic chemistry series. In case you think, by now, that all is chemistry or anatomy, check out cassettes on Urinary Tract Infections, Therapeutic Considerations in Coronary Heart Disease, or Board Exam Questions. Records are available of Stethoscopic Heart Sounds and many others as well as filmstrips that range from Hematopathology to Patient Procurement. If you need to review your osteology, we've even got a skull, spine, extremity and rib bones.

We're justifiably proud of our school, its library and its increasing bank of special facilities.

New Parking

This Fall we found our campus filled with 300 plus students — nearly a 50% increase over last year's 182. The resulting parking problem was quickly solved by building a second 75 space lot between the gym-dissection building and the cafeteria-annex building. Our original lot provides 150 spaces.

Old Developing Solutions

Want a painless way to donate to Western States Chiropractic College? Turn your old developing solutions over to salvaging people such as Sherman Hill, 1901 S.E. 49th Ave., Portland, OR. (234-6759) for prompt pick up. The value of the silver can be sent to W.S.C.C. You'll be provided with a slip indicating the tax deductible donation.

Auxiliary News

With the new school year into full swing, the W.S.C.C. Auxiliary is moving right along with new ideas. Bake sales are scheduled for every fourth Wednesday of the month. Pies, cakes, cookies, and breads can be purchased from 11:00 a.m. till 1:00 p.m., in the Foyer of the Administration Building.

Also, a Halloween Party is scheduled for Oct. 25, at 7:00 p.m. in the East Room of the Gym. Admission is that a costume must be worn and you must bring your own pumpkin for the pumpkin carving contest. Prizes will be awarded. All students, wives, children, and faculty as well as Administrative Personnel are invited. If you like bobbing for apples then come and join the fun.

Meetings are scheduled for every second Thursday of the month, at 7:30 p.m. in the East Room of the Gym. This is your time to bring up any ideas that can make our organization successful. At these meetings we have guest speakers that are beneficial for every student and their spouses. Refreshments are served.

This is your time to get acquainted with fellow students and get to know their families.

Dr. Robert Elliott III

The college has received word that Dr. Robert Elliott, past president of the school, is a patient at Portland Adventist Hospital. He recently underwent exploratory abdominal surgery.

Dr. Elliott's many friends pray for his comfort and fast recovery.

New Faculty

This article is the first of a series intended to acquaint you with new members of our faculty.

Dr. Paul Shervey is one of the new members of the faculty at Western States Chiropractic College. His assignment is teaching Gross Anatomy by means of human dissection. He is well liked by his students and well received by his colleagues.

Dr. Shervey received the B.A. degree at Concordia College and a M.S. and a Ph.D. from the University of North Dakota.

Before joining our faculty, he was a teaching fellow at the University of Saskatchewan School of Medicine. He also taught Anatomy for several years at the University of Nebraska Medical Center. Dr. Shervey has numerous publications in such journals as the Anatomical Record and The Americal Journal of Anatomy.

Delta Tau Alpha, Honorary Fraternity Now On Campus

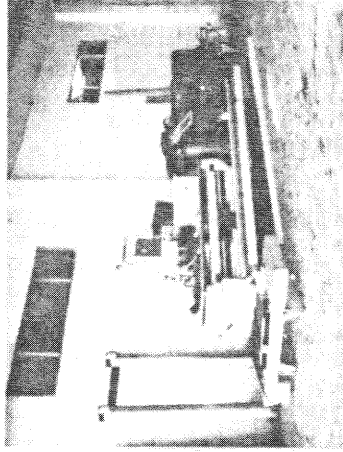

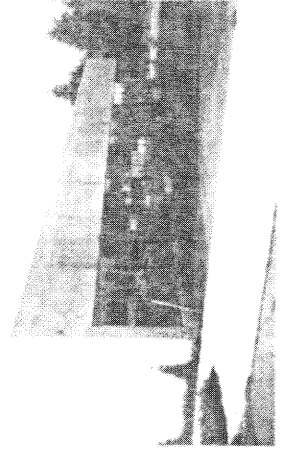

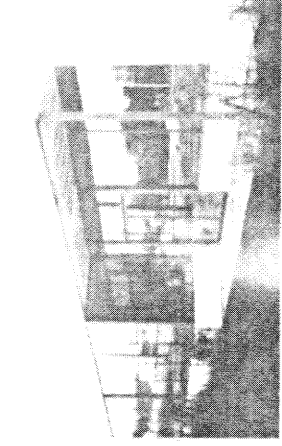

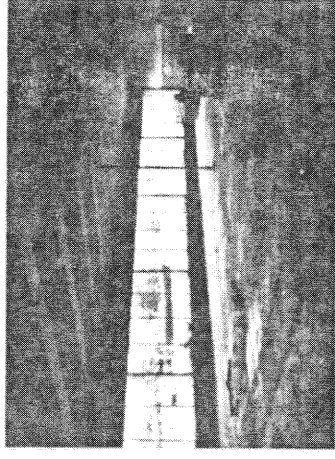

A new and welcome addition to the student activity scene at W.S.C.C., has been the organization of the Epsilon Chapter of the Delta Tau Alpha, Honorary Fraternity. The elected officers are: president, Chuck Hathaway; vice-president, Dale E. Clark; secretary, Steve Gardner; treasurer, Ross Hart; Historian, Scot Fechtel; pledge-master, Cyle Zurflueh.

The first official function of the fraternity was in assisting with the joint O.A.C.P. - O.C.A. Chiropractic Convention at the Portland Sheraton Hotel on September 19-20, 1975. The Convention provided the opportunity for the D.T.A. to do something useful for the profession and at the same time to give fraternity members the chance to meet some of the Doctors in the field in order to better exchange ideas.

The first "Rush" function was held on Friday evening, October the 10th, in the school cafeteria. The evening program included an introduction of the fraternity with refreshments served afterwards, and included some 50 interested students and their wives.

The D.T.A. is looking forward to a good year with various services and projects, planned at bettering Chiropractic education and public awareness of the advantages of Chiropractic Care.

New Clinic Programs

Drawings have now been completed by the engineer's office and approval by the Planning Commission is being requested.

Gifts and Donations are being sought by the college for equipment to furnish the interior. Several equipment suppliers have generously donated various types of equipment including adjusting tables.

Any donations to the new clinic will be appreciated. Gifts are tax deductible.

The Real Estate Committee of the Health Research Foundation headed by Dr. Ralph Hill is currently negotiating for sale of the contract on the old school at 63rd and Foster in Portland. The school was sold some months ago but the contract is being held by W.S.C.C.

The accompanying recent views of the unimproved facility show its great potential, both in size and beauty.

Estimates are that it will be several months before the clinic will be operable.

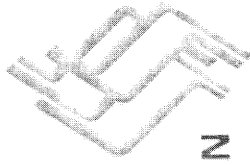

W.S.C.C. Bookstore

The Bookstore celebrated its first year of operation September 15th with expansion, redecoration, and approximately 300 new and returning students. Additions include bookshelves, storage space, a new full time employee, and display counter. We now carry the Dennis lab and clinic coats for both women and men. These are finely tailored and made to last. Also available are the beautiful Lloyd tables and accessories. Behind the scene we added reference books and catalogs to locate just about any book or equipment requirement you may have.

This month the bookstore is happy to offer four excellent books. The first is **Fundamentals of Orthopaedics** by Gartland. This concise text gets to the point on the major orthopaedic problems including disorders of the joints, neuromuscular disorders and management of fractures and dislocations. Descriptions are concise and followed up usually with clinical pictures or x-rays. This 1974 edition is \$13.50 plus 30 cents for postage.

The second feature is the pain series by Rene Cailliet, M.D. The series includes **Low Back Pain Syndrome**, **Neck and Arm Pain**, and **Shoulder Pain**. Each book is a sound, common sense guide for diagnosing and treating painful or disabling conditions in a specific anatomical region of the body. He takes up various conditions and shows how each is related to the abnormal mechanism causing the pain or disability. These books are \$4.50 each plus 25 cents for postage.

The bookstore would like to extend an invitation to all doctors to visit us when ever you come to the school. Our hours are 12:00 noon to 4:00 p.m., Monday thru Friday, and our phone number is 256-3180. Whenever you are looking for books or equipment, give us a call first. Write today for a list of the books we carry.

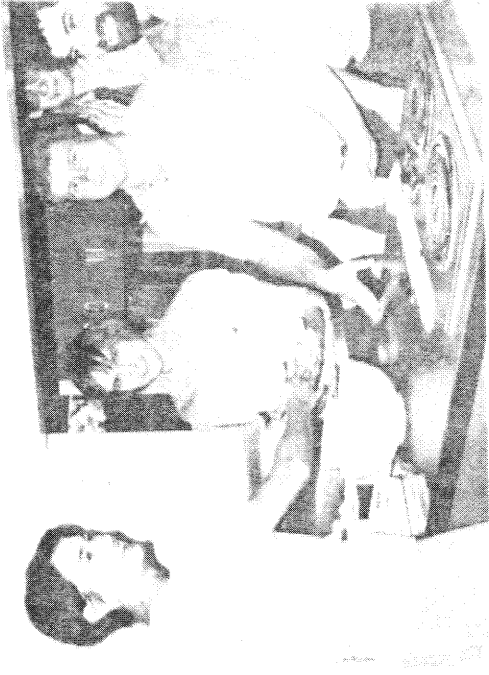

WESTERN STATES CHIROPRACTIC COLLEGE

Cornellius, OR 97113

New Cafeteria Service

Western States Chiropractic College Food Service originated this summer through the efforts of three W.S.C.C. students, namely Matt Nomm, Leah Nomm and Kent Hartzberg. With the help of these students the food service was established in the annex. There were many problems that had to be conquered but with the support of the administration, W.S.C.C. Food Service was able to serve its first meal at orientation.

Although meeting the needs of all students is at times a bit difficult, this food service is run by and for students, so every effort has been made to satisfy each request.

The Food Service is open from 8 a.m. to 4 p.m. daily. A luncheon Menu consisting of a salad bar, a variety of sandwiches, refreshments and a hot soup or vegetarian special is offered. After lunch, sandwiches and beverages are available until closing. In the near future chili and clam chowder will be added to the menu.

Drop in whenever you can and see the additions to our ever growing campus.
