

September 1975

CCE Meeting Denver

President Warren and Dr. Oliver Titrud, Academic Dean attended the Council of Chiropractic Education meeting in Denver, July 23 through July 27, 1975. They appeared before the Council on Accreditation to support a progress report that had been submitted

earlier. The report had been well received and required no defense. In fact, the school was complimented by Dr. Orval Hidde, chairman of the Commission on Accreditation, for keeping the commission so well informed as to the changing situations at Western States Chiropractic College.

The meeting of the Council considered matters of critical interest to the Chiropractic schools of the United States and Canada, particularly as they relate to the procedure of accreditation. The relationship of C.C.E. to the Department of Health, Education and Welfare and O.E.C.C. were presented as were the need and opportunity for research. The possibility of federal funds to support research in the Chiropractic primary health service seems an important potential.

A summary of business conducted at this meeting will be given in greater detail in the near future.

... GROWING ...

Did you know that W.S.C.C. (or its predecessor schools) was started 68 years ago . . . that it became "Western States Chiropractic College" 43 years ago . . . that we moved to S.E. 63rd Ave. 28 years ago . . . and that we occupied our beautiful new campus 2 years ago?

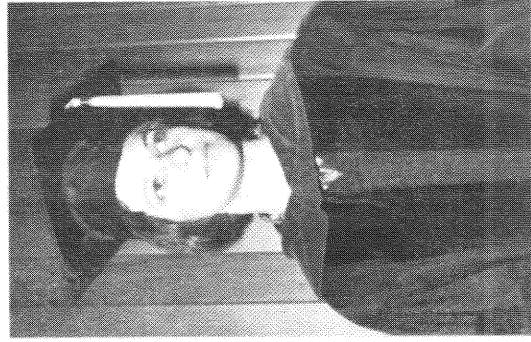

During most of that time we stayed small — not in quality but in numbers of students. For the last few years, however, we have been experiencing a healthy growth. Here are some statistics . . .

Year	Enrollment			% Increase
	Male	Female	Total	
1970	38	0	38	—
1971	59	1	60	58%
1972	84	5	89	48%
1973	135	12	147	65%
1974	189	17	206	40%
1975*	288	31	319	55%

*Enrollment count not complete as of this date.

The school plans to grow to about 500 students in the next several years and maintain this level thereafter. To match this enrollment growth we have doubled last years faculty by adding 14 new full and part time instructors (including several Ph.D.'s). As many as three sections will be offered this fall for many courses. The addition of electives and the development of certain coordinated courses enhance our present program. All will benefit from the acquisition of new microscopes, serometers, and other equipment and facilities. Twenty-four cadavers are being procured for the Freshman anatomy and dissection classes to help make one of the finest and most unique centers for chiropractic education anywhere.

Speaking of facilities, starting again this fall, the W.S.C.C. campus will have its own food service providing increased selection of hot food, sandwiches, soups, salads and beverages. How's that for growing?

Dean of Student Affairs

Due to the rapid growth of the student body, a need was felt to provide some more direct communication between students and faculty. This past school year, therefore, Ms. Penny Amy was appointed as Dean of Student Affairs. This office is primarily concerned with counseling of students, however, Ms. Amy will assist in such activities as student grievances and interaction of faculty and students. She feels that the students need an official representative and a sympathetic ear.

As of this fall, Ms. Amy will be working closely with student government leaders to help institute their programs. The office of Dean of Student Affairs is still in the early development phases, so we look forward to its continued growth and success.

Student Increase Approved

The application of Western States Chiropractic College to the Planning Commission of Multnomah County to increase the maximum enrollment to students from 200 to 550 was approved with some minor conditions on August 19, 1975. President Warren presented the arguments in favor of the application as it related to the impact on the residential community of increased traffic and parking. This proposal had been discussed with individuals identified as representatives of the community prior to the public hearing. In general the community was sympathetic if not approving and the opposition was limited to questions relating to increased traffic and parking.

The formal notice of approval has been received and includes several provisions relating to traffic patterns, parking and use of campus facilities.

ACA Seminar Held

The ACA Peer Review and Consultants Seminar held August 23 and 24 found many W.S.C.C. alumni from Oregon, Washington, Idaho, and Alaska involved as representatives from their respective states W.S.C.C. can be proud that so many are involved in this important work.

Among the many points for review were the upcoming new guidelines for handling Medi-care claims with the need for more extensive claim reporting and more specific correlation with the certifying x-rays of each patient. It is imperative that each office handling Medi-care Claims meets the highest standards in the production of their x-rays and carefully correlate their x-rays and clinical findings in each claim report.

Any group interested in a seminar in Quality X-ray Productions or Clinical Correlation should contact W.S.C.C. for scheduling in the post-graduate calendar.

Appa Anderson

Dissection Part Found

The widely publicized "hand" that was found in the S.E. Portland lawn did come from the Old College on S.E. 63rd & Foster. In moving from that location a can of pathological samples was left behind. When the new owners were cleaning they found the can and not knowing the contents they put it in the alley. From there neighborhood boys found the parts.

Strict supervision is maintained in the dissection laboratory. Samples are never removed and all parts must be placed in appropriate receptacles for return to the Medical School for cremation.

Any student who violates a policy of the dissection department is subject to immediate dismissal.

Bodies of all cadavers are treated with the utmost respect and dignity at the College laboratory and anyone interested in the willed body program can be assured that cadavers are under extremely strict security measures.

V.A. Office Opens At W.S.C.C.

W.S.C.C. now has an office of Veteran Affairs to assist veteran students with educational, financial & housing problems. Winston Morrow, the veteran representative will be available 3-5 p.m. Monday - Friday during the school year (other times by appointment).

The on-campus representative has a "hot-line" to the regional office and can now provide the veteran with answers much faster than could be obtained by dealing directly with the V.A.

The latest information regarding the 9 mo. education benefit extension is that all vets attending W.S.C.C. without a 4 yr. degree qualify for the additional 9 mo. benefits. The V. A. wants the extension to apply to *all* vets and are actively trying to convince Congress . . . don't give up!

Each vet should be aware of tutorial monies available. The V.A. will provide the student with \$60.00/month for 9 mo. to cover tutorial expenses. If students don't use the money the V.A. keeps it. V.A. loans are available to veterans for educational purposes and are much easier to obtain than before.

In cases of hardship the school will provide the student with a loan until their V.A. problems are resolved.

Elective In Diagnosis

Dr. Jack Daugherty, head of the Department of Diagnosis, announced the offering of an elective course in Iridology. The class will be taught by Wayne Hines, O.D. of Chehalis, Washington. Dr. Hines won the Humanitarian Award in 1974 at the International Optometric Association convention for his presentation of Iris Diagnosis.

Doctors interested in taking the class may contact the Registrar's office. Students having completed Physical Diagnosis will be admitted to registration.

The course will meet each Wednesday, from 3:00 to 5:00 pm, beginning September 17 and lasting twelve weeks.

ACA Day

At W.S.C.C.

September 18th

The American Chiropractic Association will have Association President Dr. Wm. Dallas of Washington at the campus on September 18th to speak to the student body on the program of the A.C.A. Also planned is a speaker from the Council of Women Chiropractors.

S.O.T. Speaker

Dr. Jack Daugherty, chairman of Clinical Diagnosis Department, was a speaker at the last SOT convention in Harrison Hot Springs, B.C. on August 23-24, 1975. His presentation on "Muscles of Posture" will be given again at an SOT Seminar in Omaha, Neb. on October 2-4.

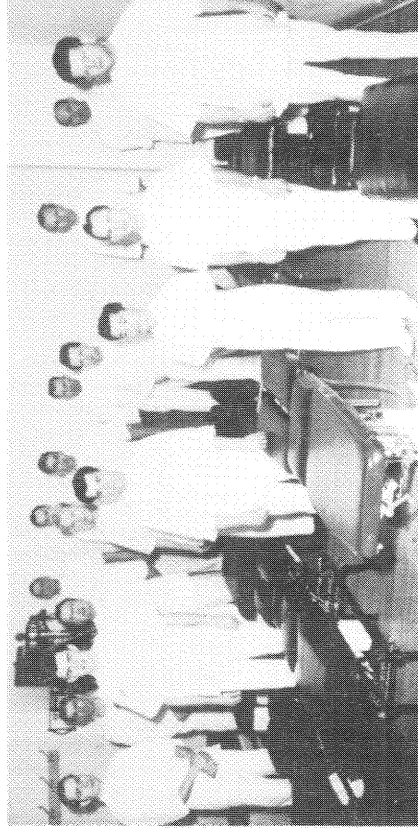

As a representative of Western States Chiropractic College, he will attend a meeting of the CCE Accreditation committee at Columbia Chiropractic College in New York from September 16th thru 19th. "Dr Jack" is certainly a busy member of our team.

Doctors' Assistants

Recent graduates who are awaiting licensure are seeking positions as Chiropractic assistants in doctors offices on a temporary basis. In some cases this could lead to a more permanent situation. Doctors who are interested in such assistants, please contact Penny Amy, Dean of Students or Dr. Oliver Titrud, Academic Dean, at Western States Chiropractic College, 2900 N.E. 132nd Avenue, Portland, Oregon 97230 for further information.

Doctors will be given an opportunity to interview applicants.

Who's Who?

New Microscopes At W.S.C.C.

A recent purchase of 40 Nikon binocular microscopes was completed with United Medical Laboratories. The fully reconditioned scopes were surplus of the companies cytology and hematology departments. A one year warranty is in effect with U.M.L.'S Instrument Service department making the transaction a real "buy". The new scopes retail value is \$1,405.00, but the college was able to negotiate to about one fifth of that figure.

Ms. Penny Amy of the Department of Environmental Biology said the new instruments will be used in microbiology, histology, embryology and clinical laboratory.

Purchase of the microscopes was achieved through the student microscope rental program and a special loan fund. Gifts from the field for underwriting this project will be gratefully accepted.

A first quarter student is having a difficult time remembering the relative position of the internal organs she sees in dissection . . . A professor teaching physical diagnosis wants to find a good way to show pathologies of the eye to his students . . . A chiropractic professional group is showing a film on campus and needs a projector and a projectionist.

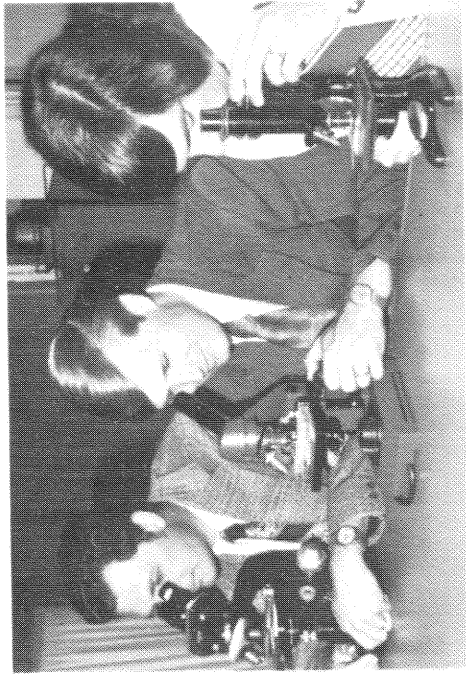

Solving these, and many other similar problems will be the task of the INSTRUCTIONAL MEDIA CENTER, which began operation on the campus August 1st. The student of anatomy might go to the library to view stereoscopic slides perhaps with a specialized anatomy book from the shelves. The professor would meet with the Center staff to order and prepare visual aids that will show eye pathologies. The professional group could fill out an equipment request form found in the main office and would be contacted by the Center to arrange for a projectionist.

Thus, in addition to maintaining and distributing

Instructional Media Center

audio-visual equipment, the IMC will develop learning and teaching aids especially suited to the curriculum at Western States. The use of audiovisual aids in education have increased dramatically in recent years and many innovations are available which assist both students and faculty in comprehending and communicating information. The IMC has been established to assure that these aids will be available to meet the increasing educational demands of today's chiropractic education.

The IMC, located in the east wing of the gymnasium building, is a function of the William Budden Library. The Director of the Center is Arn Strasser. A Western States student, Mr. Strasser received his masters degree from Michigan State University in history and has had teaching and media experience. Karen Busch, learning aids coordinator, and Steven Mellor, a media coordinator, complete the IMC staff.
