

Spring 1977

## President's Message

Dr. Richard H. Timmins

### A Look Back in Time

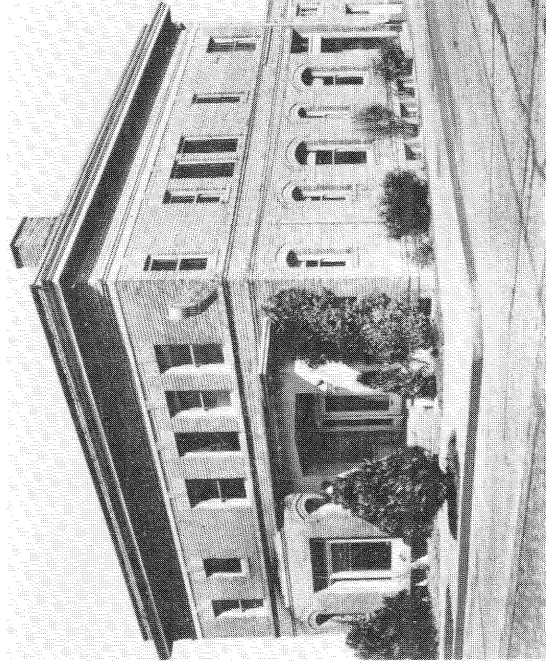

While looking through some historical files, I came across a picture of one of the College's previous locations — a building which at one time had been a mortuary. The structure was neat as one viewed the exterior view, but small. For the day, it served students adequately, but in comparison to today's needs it would be grossly inadequate. However, we must never forget from where we came. Without the dedication of the teachers of that period, chiropractic would not be where it is today.

In a real sense, Western States has the same situation (and the same problems). In any type of education, "So it is always". Just as the profession was growing then, it is continuing to expand, but at almost a frightening rate. The demands of health care and health care providers never was as immediate in the minds of people as it is today. The colleges find it hard to keep up with all the demands placed on them.

Visitors to the campus and the new clinic are impressed with what they see, and yet, we cannot be content because today is today and tomorrow's students will not be served well with today's facilities or educational program.

The Western States academic community will do its best to prepare for the needs of students and the profession in future years, but it is not a task we can do alone. Chiropractic colleges differ from liberal arts colleges greatly in two ways — the colleges do not have endowments and federal support is not presently available to chiropractic institutions as it is to medical schools. It is hoped that in the future this will change, but for now we must turn to members of the profession and to friends of the profession.

One can always think of excuses to not support a cause, but fortunately there are many people who seek out reasons why they should give. We hope you are one of those. To meet our immediate needs we must have your support in making WSCC the great college it can be. Can we count on you?

### New Catalog April 1st

The new Western States Chiropractic College Catalog is now available from the Admissions Department.

Many changes have been made and the Administration of the College recommends that anyone preparing for admission to the College obtain a copy in order to make proper preparation in their pre-chiropractic programs.

Tuition has increased, as was predicted in the previous catalog, and will be \$750.00 per quarter starting the Summer 1977 quarter.

Course descriptions have changed along with the number of hours required for various subjects. Electives have also been added. This has been done in order to keep in line with the educational requirements of several states.

## Campus Visitors

The campus is attracting a number of important visitors to both view the campus and to work with us.

Joseph Bohlen, Ph.D., Chairman of Committee B of the Council on Chiropractic Education and a Professor at Iowa State University was on campus in December for an informal visit.

James Christianson, Ph.D., Professor Emeritus at Buena Vista College and a consultant to CCE, was on campus in November to conduct nutritional seminars.

Cynthia Preiss, D.C., President of the California Chiropractic Licensing Board, was on campus in December to talk with students and to visit the school for the first time.

Professor Edwin Webb, Vice-Chancellor of MacQuarie University in Australia, was on campus in November as part of an investigation into chiropractic in the United States.

## Winter Quarter Scholarships Awarded

On January 27, 1977, the Scholarship Committee made presentations of awards for Winter Quarter. Alan Pearson and Barbara Rassow each received \$500 awards from the Parker Chiropractic Research Foundation of Ft. Worth, Texas. John Hurd and Gary LeGendre each received \$500 scholarships sponsored by Mr. James Moffitt.

These students were chosen by the Scholarship Committee for records of academic excellence, their potential for significant professional contributions, and overall service to the WSCC community. We commend these outstanding representatives of the student body of Western States and wish them creative service to Chiropractic.

## W.S.C.C. Bookstore

The bookstore is continuing to grow and expand. We now are carrying both the Thompson Table and the Zenith-Hi-Low Table at reasonable rates. Our selection of medical and chiropractic equipment is also increasing.

This month we are highlighting "The CIBA Collection of Medical Illustrations" by Frank H. Netter, M.D. This set contains eight volumes of copious illustrations and descriptions of normal and pathological anatomy in full color plates. The volumes are as follows:

- Volume I - Nervous System
- Volume II - Reproductive System
- Part I - Volume III Upper Digestive Tract
- Part II - Volume III Lower Digestive Tract
- Part III - Volume III Liver, Biliary Tract and Pancreas
- Volume IV - Endocrine System
- Volume V - Heart
- Volume VI - Kidneys, Ureters, and Urinary Bladder

This collection has a place in every doctor's office. The price this month in the bookstore is \$134.95 (regular \$149.). All orders must be prepaid with 5% shipping and handling charges included in the check.

## Clinic Equipment Received

Williams Manufacturing Company, Elgin, Illinois, manufacturers of Zenith Chiropractic Tables has now placed two tables in the new clinic on consignment. The latest table to arrive is a Zenith Thompson pneumatic table. Dr. Clay Thompson of Davenport, Iowa and Dr. Walter V. Pierce of Dravosburg, Pa. were instrumental in helping W.S.C.C. receive the Thompson equipment. Dr. Pierce has also given a Dermo-Therma-Graph 500 on consignment.

Relax-o Products of Nappanee, Indiana has donated four 203-Standard Adjusting Tables and four covers for tables that were in need of repair.

Kyro Manufacturing of Fort Worth, Texas has donated the DC-101 Lift-O-Matic Table.

Dr. Jacqueline O'Keefe has donated a Corning AG-1A Distiller. This piece of equipment is a necessity both in the chemistry and microbiology laboratories and at the clinical laboratory.

The College appreciates the generosity of these and other manufacturers who have given or consigned equipment or supplies to be used in educating chiropractic physicians.

## The Mini-Health Fair

Dear Mark:

Our Mini-Health Fair was one of the most unusual and successful innovations in promotions we have had at Jantzen Beach Center. In greater part, we can attribute the success of our two-day event to the splendid participation and tremendous cooperation of the Western States Chiropractic College.

It is always a pleasure to work with people who exhibit professionalism and sincere concern for the public as shown by your group.

Again, our sincere congratulations for helping make this a truly successful program which we look forward to hosting again - and we hope you will join us. Please extend my personal thanks to everyone in your group.

Most sincerely,

Pat Coleman  
Public Relations Director  
Hayden Island, Inc.

## Library Continues Improvement

1. The library has purchased 4 rows of new metal shelves for the journal collection. These shelves replace a miscellaneous assortment of shelves left over from the old school, Marycrest High School and UML. The older shelves were sent to offices on campus for faculty and staff use.

2. Dr. Robert Collins is the new director of the Instructional Media Center. Dr. Collins has an Ed.D. and did his research in audio-tutorial systems. He is developing an audio-tutorial program for the school. He is assuming the position in addition to his teaching responsibilities.

3. The Student ACA has rented a Xerox copy machine to replace the old copier owned by the student government. 50% of the profits from the new machine are used to purchase books for the library. So far this has meant \$30-50 per month in donations.

Other donations received recently have been:

1. Nutrition and dietetic journals from Dr. Klier
2. Chiropractic and medical books from Dr. MacFadden
3. Health food books from Mrs. Kieffer of Mt. Home, Idaho
4. Dartell Labs - book-a-month program
5. L.W. Porrett, D.C. - books

4. The library is in the process of establishing a rare book room. The historical collection, developed by Dr. Stonebrink will be the first books included. Other books will be added as their value becomes apparent.

Older, out of print books that are directly related to chiropractic or natural healing will be automatically added. One of the main goals is to have a complete collection on chiropractic. Hopefully, the collection will contain at least one copy of every book written on the subject. The first copy of each title will be placed in the rare book room, with subsequent copies on the shelf for general circulation.

## Alumni News

Steve Oliver, D.C.  
President

On behalf of the Western States Chiropractic College Alumni Association I would like to invite and encourage each and every Alumnus to become an active member of our Association. Our Alumni Association should be a major contributor and advisor to the College. It is only through our support as chiropractic physicians that Western States will grow and maintain the standard of education that we want and need.

Four active committees have been formed:

1. Membership committee, Dr. Appa L. Anderson, Chairman
2. Fund Raising Committee, Dr. David MacFadden, Chairman
3. WSCC Curriculum Advisory Committee, Dr. Ron Plamondon, Chairman
4. Alumni Projects Committee, Dr. Steven Oliver, Chairman

These committees need the support of all WSCC Alumni. If you are interested in helping us to create a strong and active association please contact one of the committee chairman or come to our next Alumni luncheon.

Next Alumni Meeting will be on Wednesday evening, May 4, 1977, at the East Gym with Dr. Dangerfield presenting an hour and a half program on extremity adjusting.

## “Together We Can Make It Happen”

Dr. D. MacFadden  
Dean of Administration

Back in July of 1974 I wrote an article with the same title as today's. The situation was critical. We had an impossible mortgage to meet and very little time in which to meet it. My job at that time was to rally the profession around to support our program at W.S.C.C. We did gain support but not enough to purchase the contract as it had originally been accepted by H.R.F. Many of you remember the involvement of Continental Securities (Church Services) and the suit that we entered into.

Then we were able to renegotiate our contract with the sisters and gain strength in several years of operation at our new campus.

Today our payments to the Sisters total \$8,300 per month. Our goal was to have 83 practitioners giving \$100.00 per month in order to pay the mortgage. We have fallen pitifully short of this goal. In fact, our total contributions for the first quarter of 1977 are far short of estimated budgeted amounts.

Doubtless, many of you have forgotten to send your pledge and are planning to do so in the near future. I certainly hope that others are planning to join in shortly with a pledge to the College.

Contributions to the College are tax deductible. You may contribute to the Campus Mortgage Fund, The Clinic Purchase or for many other areas of need including the library, Basic Sciences Department or Clinical Science Department.

An important area today is the Research Department where nutritional studies are currently being done. Any financial help you would like to make in this area would also be of value to the chiropractic profession.

Some of you will remember back in 1974 when I made personal contacts at your offices. Some agreed to help support and others were very negative. We have now shown our stability. We are not going to go down the tube. We're here to stay and we need the support of the profession to show even greater progress in the future.

“Together we can make it Happen”

Won't you join us?

## Chiropractic Economics to Feature W.S.C.C.

Mr. George M. Davidson, Vice-President and Managing Editor of the Digest of Chiropractic Economics has notified Dr. Timmins that the magazine will feature Western States Chiropractic College in their May/June issue 1977.

“Economics” has been featuring the colleges regularly with several pages of copy and cover pictures. Western States is very happy to have this additional exposure and is pleased that the magazine is promoting chiropractic education.

## W.C.A. Report

A very handsome new publication entitled “Answers to Your Questions About Chiropractic” is now available by contacting the Washington Chiropractic Association, 500 Wall St., Suite 402, Seattle, Wash. 98121.

Prospective students in Washington State should obtain a copy of the pamphlet for answers relating to chiropractic regulations, colleges recognized by Washington, federal recognition of chiropractic and many other items related to chiropractic practice.

## Thank You

To all of you that have participated in our program of Student Prospect Interviews ... We thank you ...

It is a time consuming job to interview student prospects. They have many questions that need to be answered and we must as a profession do an excellent job of selecting those candidates that best fit the requirements of a future chiropractic physician.

Would you like to serve as a Regional Interviewer for W.S.C.C.?

Please fill out the following and return to the College if you are interested.

### STUDENT REGIONAL INTERVIEWER APPLICATION

Name: \_\_\_\_\_

Address: \_\_\_\_\_

Telephone: \_\_\_\_\_

I would be happy to interview prospective students in my area. \_\_\_\_\_

## DCE Report

### CLINICAL ANATOMY SEMINAR POSTPONED

The Clinical Anatomy Seminar originally scheduled March 26 was rescheduled for May 7 in order to provide optimum availability of faculty and anatomical specimens.

Doctors who registered for the March class were automatically registered for the May session. Those wishing a refund should contact the college.

### DR. JAMES B. CHRISTIANSEN RETURNS FOR SYMPOSIUM

James B. Christiansen, Ph.D., Emeritus Professor of Chemistry at Buena Vista College in Storm Lake, Iowa, returned to Western States on April 22-23 for another continuing education session on nutritional biochemistry.

Dr. Christiansen's topics included vitamins A and B, energy metabolism, and electrophoresis and immunoelectrophoresis with demonstration of laboratory techniques.

### DCE MAKES PLANS

The Division of Continuing Education is beginning to plan

the schedule for the 1977-78 school year. Requests, suggestions, or comments regarding continuing education offerings would be helpful to the College as it seeks to meet the needs of the profession in this important area.

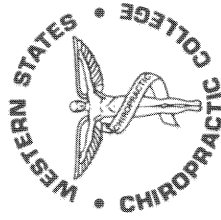

### POST GRADUATE ORTHOPEDICS

Approximately 40 doctors are participating in the Post Graduate Orthopedics Course which meets one weekend each month.

The course is a cooperative effort of WSCC and the Council on Orthopedics of OACP.

Dr. Robert Jackson, President of the Council on Orthopedics of ACA from California, will present the May seminar. His topic will be peripheral vascular disease.

Doctors are welcome to attend individual sessions even though not enrolled for the entire course. Credit is given toward Oregon license renewal as well as toward Board certification in orthopedics. Watch your mailbox for announcements.
